**ELECTION INSPECTORS.**

Chairman Hustace of the Board of Supervisors will appoint the same election inspectors for the Island of Oahu that Governor Frear does. This has been practically agreed on between the two officials. The city and county act provides that at the first election the chairman of the Board of Supervisors shall appoint the election inspectors for the municipal election.

**FROM MEXICO.**

The following paragraph was clipped from the "El Sol," a newspaper at Hermosillo, Mexico, it being a part of a letter to the publisher from a friend:

"On my last trip to my properties on the frontier, my heart felt with me to the ground, wounding me badly, but by a chance provision I had brought in my valise a flask of Chamberlain's Pain Balm, and after using it I was able to continue my journey the following day as if nothing had happened. I never tire of praising this popular liniment or of recommending it." For sale by Benson, Smith & Co., Ltd., agents for the Hawaiian Islands.

## ONE DESIGN SMALL BOAT INFORMATION ARRIVES

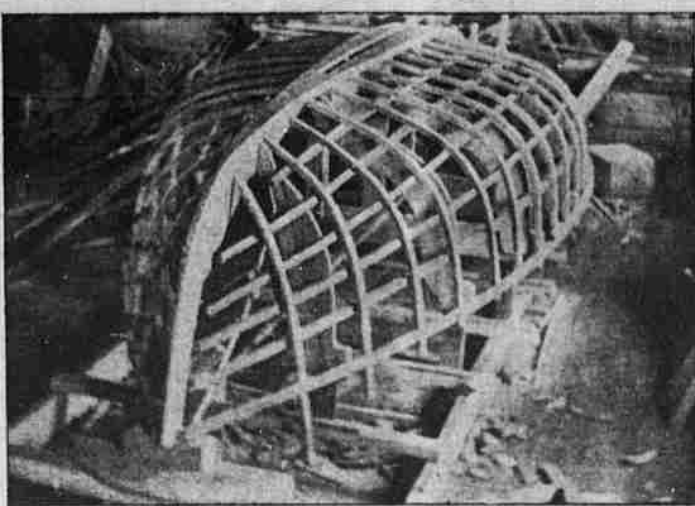

Hurrah for the one-design small boat! It will be here very soon, and at a price that will make it possible for anybody with moderate means to participate in the grand sport of racing small sailers. H. D. Bowen, who wrote to the American Gasoline Motor Company of Baldwinville, New York, some time ago with an order for a set of "Sea Wren" frames, has received a reply from Mr. Tallmadge, the manager of the company, giving much interesting information.

The most important item in the letter is with regard to the price of the parts. Ten skeleton frames with timbers, keelson and fore-and-aft timbers all ready to be fitted into place and the planking to cover these with, and also decking, may be had for \$375. This material is practically all that is needed to complete the hull of the boat.

Supposing that the freight on each

"Sea Wren," which I shall be very glad to send forward promptly, I have noted what you say about the additional boats to be built, and the orders to be received, and I trust that the boat will be satisfactory in every way.

You will need no instructions except those contained in the "Rudder," and our instructions for putting up the moulds of this boat keep up. Ordinarily I would not recommend your going to this trouble, but what I have in mind is this: If your companions want ten of these boats, the best way to ship them would be to send the frames with all the bench work done, in what we call the partly-completed condition. You see the freight rate on an erected frame to the Pacific Coast and the steamer freight is going to be out of all proportion to the value of the boat, because of the bulk the frame takes up for its light weight, and it is exceedingly difficult, if not practically impossible, to erect these frames and knock them down and ship them with the frames bent and expect them to stay in position, because of the construction of

HOW FRAMES ARE FILLED ON SEA WREN.

set amounted to \$10, the material for a hull may then be obtained for \$50 at the outside. The mast and sail, rudder and center-board would not amount to more than \$20, making \$70, and that would leave \$30 for labor on each boat to make it come within the \$100 limit, which is the point most desirable.

This is all that the local enthusiasts have been waiting for before they took some definite steps toward starting this class, and now that the information has arrived and is of such a very satisfactory nature, there will be something doing in this line very quickly.

There is no doubt about ten men coming in on the deal, and, by the time the matter has been talked about a little, there will probably be fifteen or twenty of these little racers on the bay. The great beauty of this type of boat is that she is practically non-capsizeable, is very speedy, and is a good sea boat. It sounds like an impossible combination, but reports in Eastern magazines go to show that what Mr. Day claims for his design is perfectly correct.

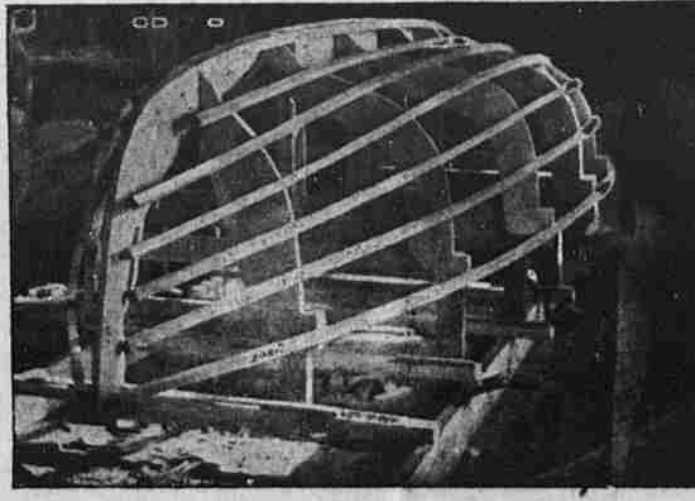

The letter also states that ten frames without planking will be shipped for a price of \$225, and it is probable that this will be the proposition accepted. The reason is that some of the experts, who understand local conditions, think

the boat. If we had designed the boat ourselves, we would have overcome this difficulty, but in building from another architect's designs we have to follow his construction, which is not always adapted to knock-down work, therefore we suggest that you erect these moulds in permanent shape and we will supply you with the partly-completed material for \$26 net for each frame. If ten frames are ordered at one time, I will make a special price of \$225 for the lot and \$150 for ten sets of planking.

In order that you may have a better idea of the method of erecting these moulds in a permanent way, I am sending with this letter two photographs, the first one showing the moulds erected with the battens on and with the keel and stem and center-board trunk, which is let down between the moulds, in position. Note please that the three center moulds are cut in the center to allow this trunk to drop in between.

The second photograph shows the method of fitting in and bending the frames, and the sheer strake should be attached before taking off the moulds, although, if desired, the boat can be planked on the moulds just as it stands.

I am getting very satisfactory reports from the "Sea Wrens" which have been built, not only as to their seaworthiness, but a general goodness

SEA WREN WITH MOULDS ERECTED AND BATTENS ON.

that a longer boat than the original Sea Wren would be the thing for these waters, and, if the moulds are placed farther apart, and the boat lengthened in this way, the planking sent from the factory would be useless.

The two pictures, which appear on this page, give a very good idea of the size and shape of the original and of the manner of building the boat. The keel is set in the moulds instead of the keel being on the ground and the moulds standing above it. This is a novel way of doing it, but evidently the best and quickest method for that size of craft.

The following is Mr. Tallmadge's communication:

Baldwinsville, N. Y., Sept. 8, 1908.

Dear Sir—I have your favor of the 21st, enclosing remittance covering your order for sawed-out material for the hull of the boat, and Mr. Day, of the "Rudder," personally assures me there will be a large number of them built this next year. We have supplied frames for something like 75 per cent. of all the "Sea Wrens" of which the Rudder people have a record of building.

Regarding power, it would make a very satisfactory arrangement to equip the "Sea Wren" with a light 1½ horse motor, and in erecting the boat you could, if you wish, bore your skeg and keel for a shaft-hole and plug this hole temporarily if you did not want to use it at once.

Please let me know how the boat comes out. I take it that you have the December and January Rudder, covering the instructions, and I am sending

you sail plan showing you dimensions. Very truly yours,  
J. TALLMADGE.

## WILL MAKE TEST OF CAMPAIGN FUND ACT

A test case will probably be filed in the United States court today or tomorrow to ascertain whether a corporation in the Territory of Hawaii comes under the provision of the Act of Congress prohibiting corporations from contributing to campaign funds.

There is considerable doubt in the minds of many leading attorneys here as to whether the act applies to Hawaii. When U. S. District Attorney Breckons received a letter from Washington recently in answer to his inquiry concerning the act, he was instructed that if any such contributions were made he should bring the matter into court, and papers are being prepared to meet the issue.

The advisability of testing the act was discussed by the members of the Republican County committee Tuesday evening, but there was some hesitancy about taking up the matter. Nobody wanted to be the martyr.

Mrs. Philip L. Weaver and Mrs. Dorcas Seidler are spending this week at Kaneohe.

## BAD COMPLEXIONS

Dry Thin and Falling Hair  
and Red Rough Hands

Prevented by

## CUTICURA SOAP.

MILLIONS use CUTICURA SOAP exclusively for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, in the form of baths for annoying irritations, inflammations, and chafings, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative antiseptic purposes which readily suggest themselves to women, and especially to mothers, and for all the purposes of the toilet, bath, and nursery. No amount of persuasion can induce those who have once used it to use any other, especially for preserving and purifying the skin, scalp, and hair of infants and children. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA, the great skin cure, with the purst of cleansing ingredients and the most refreshing of flower odours. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP AT ONE PRICE, the best skin and complexion soap, the best toilet and best baby soap in the world.

**Complete External and Internal Treatment for Every Humour.** Consisting of CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales and soothe the thickened cuticle, CUTICURA Ointment, to instantly allay itching and irritation, and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood. Sold throughout the world. Australian Depot: R. Towns & Co., Sydney, N. S. W. So. African Depot: Lissner & Loh, Cape Town. "How to have Beautiful Skin, Hair, and Hands," free. CUTICURA CO., Boston, U. S. A. Sole Props., CUTICURA REMEDIES.

## REGISTERED NUMBERS OF AUTOMOBILES

There have been a number of requests for the numbers which are required by law to be placed on the rear of automobiles operated in this county, and the following list gives the information desired up to date, according to the records of Clerk Chas. H. Rose of the police department. Notice is also given that all machines without numbers must have numbers placed on them at once:

No.	Name.	No.	Name.
